

**600A, 35 kV Class
Elbow Tap Plug (ETP)**

APPLICATION

The Chardon Elbow Tap Plug (ETP) is used to convert a standard 600A deadbreak interface deadbreak interface of to a standard 200A loadbreak interface.

The ETP is ideal for applications where a 200A tap is desired for test or ground purposes. The ETP is also ideal for adding a 200A tap to an existing 600A T-body connector. The 200A interface allows for live test, visible ground, addition of a 200A tap, or installation of an elbow arrester.

The Chardon ETP meets all the requirements of IEEE standard 386, and is 200A three phase switching and three phase fault close rated. Furthermore, it incorporates an all copper current path, which provides reliable and consistent performance under all conditions

DETAILED COMPOSITION OF THE CHARDON ELBOW TAP PLUG (ETP)

/ LOCKING GROOVE

Locking groove assures proper installation by "locking" into elbow.

/ ARC SNUFFER ASSEMBLY

Arc quenching material extinguishes gas during loadbreak operations.

/ FINGER CONTACT

Tin plated copper contact provides a consistent current transfer during switching and fault close operations.

/ SEMICONDUCTING SHIELD

Precision molded peroxide cured semiconducting shield provides ground shield continuity and meets the requirements of IEEE Standard 592.

/ HEX BROACH

5/16" hex broach permits installation with torque tool.

200A INTERFACE

/ STOP RING

Limits piston and finger contact travel during fault close.

/ DRAIN WIRE TAB

Drain wire tabs provide a convenient point to connect drain wire to ensure grounding of the connector shield.

/ INSULATION LAYER

High quality peroxide cured EPDM Insulation is mixed and formulated in-house for complete control of rubber characteristics.

/ THREADED CONNECTION TO T-BODY

5/8" - 11 UNC copper threads provided connection to T-Body connector.
